PROJECTS

E-Commerce Web Application

<https://www.github.com/mrkevr/e-commerce>

- A monolithic e-commerce web application developed using Spring Framework, MySQL, and Bootstrap
- Has admin panel and OAuth single sign-on (SSO) for user's authentication

Exam Document Generator

<https://www.github.com/mrkevr/quiz-generator>

- A Spring Boot REST API project that enables the conversion of Excel files into multiple-choice exam PDFs
- Users can upload Excel files and the API processes the data to generate a formatted PDF document

Quiz REST API

<https://www.github.com/mrkevr/quiz-app>

- A REST API that allows you to manage your quizzes and questions.
- Aims to provide efficient platform for creating, storing, and retrieving data through a RESTful API
